Management Discussion And Analysis

Overall review, industry Structure and Developments:

It is documented that the Tertiary Service sector is growing rapidly in our country and there is a great demand for the concept of Just In time Inventory to avoid high inventory carrying cost and the concept has thrown up great opportunities to the Logistics and cargo sector.

Opportunities and Threat

While the sector offers immense opportunities to your company which your company will be able to effectively handle since your company has a track record of pioneering various Logistics operations in the country ,the threat perception is the growing number of players in the market .

Segment wise Performance

Your company will at the first instance offer Logistics consultancy to huge projects and Logistics companies and the same being neither labour nor capital intensive high profitability is assured and this will form 95% of the activity of the company ..

Out Look

As the Logistics Industry is growing leaps and bounds the overall out look for the future years for the Company and the Industry as a whole is bright and promising .

Internal control System

For the present moment since the operations are at minimum no elaborate Internal control systems are applied but alongside growth the same could be developed and deployed.

Human relations

Your company has an excellent track record of Human Relations however for the present in view of low activity levels the same is not tested .

Financial performance with respect to operational performance
